

\*Open PhD student and PostDoc positions concerning active perception at Clinical Neuropsychology lab at Ludwig-Maximilians-University, Munich, Germany\*

Open PhD student and PostDoc positions in the framework of the project „Space and action: The different meanings and uses of active perception“ of the DFG-research group „Active Perception“ at Clinical Neuropsychology lab at Ludwig-Maximilians-University, Munich, Germany, starting 1 March 2019 (flexible).

Prerequisites for the PostDoc position

- PhD in psychology, biology, computer science or related fields
- Experience with ...
  - ... neuroscientific methods (TMS, EEG, eye tracking)
  - ... patients
  - ... programming (Matlab or Python)

Prerequisites for the PhD student position

- Master's degree in psychology, biology, computer science or related fields
- Interest in the application of neuroscientific methods (TMS, EEG, eye tracking)

General prerequisites

- Interest in neuropsychological hypotheses and experimental work (involving patients)

The team consists of three PostDocs and seven PhD students with different backgrounds. A neuropsychological outpatient clinic is attached to our research unit. Research topics include visuomotor processing, visual perception, agnosias, hemianopia and spatial neglect.

The psychology department is centrally located in Munich and can be easily reached with public transportation. Munich is an attractive city often rated as one of the best cities to live in and located only an hour away from the German Alps.

For further information please contact [thomas.schenk@psy.lmu.de](mailto:thomas.schenk@psy.lmu.de). Please send your complete application (in English or German) including your CV, motivation letter, and at least two references (preferably all in one file) to this e-mail address (deadline 1 February 2019).

The University of Munich is an equal opportunity employer. Handicapped candidates with equal qualifications will be given preference.
